

Jean-Pierre Delisle

Enterprise Architect

Clear Vision to Succeed - Confident Execution

Sometimes,
an extra set of eyes
a fresh view on our big initiative
a confirmation we are on the good path
is all we need

Enterprise Architecture is all all about helping you structure and optimize

Business Layer : Interactions, Capabilities, Services, Requirements

Data Layer : Records, Transactions, References, Communications

Application Layer : Modernizing, Selecting, Interfacing, Deploying, Models

Infrastructure Layer : Provision, Maintain and Operate Optimally

Security Layer : Protect and Maintain while enabling

Bridging the digital world with real life

Clarify the how-to, why and value of your initiatives

Identify their real impacts on your staff, your customers and your budget
